

Educosoft Tracking and Reporting

Educosoft tracks every activity of the students on the platform whether it is Tutorials, Videos, E-Book Assessments, Attendance, or Class Participation. All stored data is presented via various reports for instructors, students and administrators. These real-time reports help

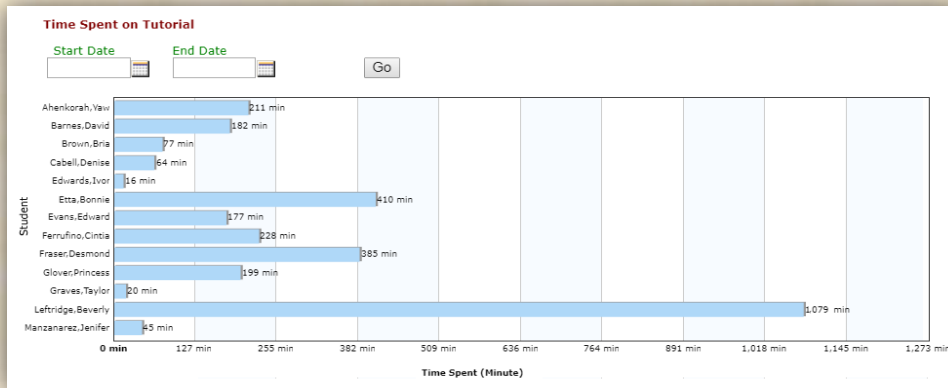

- Teachers with evaluation of learner’s performance and timely intervention
- Students assess their current status and stay on track
- Administrators make data-driven informed decisions on academic policies.

Here are some most frequently used reports in Educosoft:
